

moment of symmetry scales of 17edo

g=2, 3, 4, 5, 6, 7, 8
degrees of 17edo

These diagrams
are horograms,
invented by
Erv Wilson,
drawn here by
Andrew Heathwaite

key:

number of tones

•
MOS class
(# of L's + # of s's)

•
steps of scale
(in degrees of 17edo)
